

The Board to End All Classroom Boredom

Our interactive elite Panaboard helps you engage and maintain your students' attention.

Panaboard Education Solutions

Create Dynamic Interactive Lessons by Linking the elite Panaboard Right to Your PC

Our elite Panaboard lets you fill the screen with documents and other materials that you create on a PC, and then use an Electronic Pen to control the PC screen right from the board. You can also show Internet content on the board in a large, easy-to-see format, and reproduce images complete with sound. This makes it much easier to explain things, and lets you prepare classes that'll attract and hold your students' attention. You can also write onto documents and other materials projected on the board, and save the results to share with other teachers or for absent students to use as review materials.

Panasonic ideas for life

Enhance Your Work Efficiency with Panaboard

Panasonic offers reliable, flexible education solutions.

Active, Visual-Based Learning

Because you can control the PC screen right from the board with the Electronic Pen, you can conduct classes while displaying course materials created on a PC, or using content directly from the Internet. Stereo speakers embedded into the large, durable 77-inch board let you show images with sounds that all of your students, even those sitting in the back of the room, can clearly hear. The optional Wireless Kit eliminates the need for a cable connection between elite Panaboard and the PC.

Easy-to-Use Software

In addition to pens and other drawing tools, the elite Panaboard includes a Magnifier to enlarge desired parts of the screen, and a Screen Shade to conceal answers for more intriguing lessons. The "elite Panaboard book" software that comes with these tools also lets you create new course materials by simply combining elements from a large collection of illustrations and graphics.

Integrated Classroom Solution

Panasonic supports content-rich learning by letting you link an elite Panaboard to a variety of handy devices. Connect it to a printer to output board content on the spot. Link it to a digital camera or scanner to create course materials with ease. Or link it to the Infrared Wireless Microphone System to ensure that students in the back of the room can clearly hear you, and encourage more active classroom participation by all.

Panasonic offers a complete suite of communications, office productivity and networking solutions.
